

AUDITORS' REPORT FOR 2020 and 2021

Signers of this report, of the Nordic Association for Hydrology at the General Assembly of 2020 chosen Auditors, hereby give the following opinion on the examination of the rendered account of the Association for the period 2020 and 2021.

Objects for the audit have been minutes from General Assembly 2020, where the individual membership fees for 2021 and 2022 were set to zero, and the Board meetings 2020-2021 examining the activities of the Board, as well as the accounts of the Association with all verifications belonging to them.

As in earlier years the examination has been performed according to established Swedish audit principles. This means that we have tried to assure that the accounts do not include major faults by scrutinizing parts of the verifications, mainly those connected to specific decisions by the Board. It is our opinion that our examination gives evidence for the statements in this report.

The surplus of the 2020-2021 period amounts to SEK 62,017 and the own capital has increased to SEK 759,781. In spite of the removed individual membership fees the surplus is substantial, mainly due to old membership fees and less meeting costs.

We recommend the General Assembly of 2022 to:

- adopt the results and balance sheets for 2020 and 2021, and
- grant the Board discharge from liability for the administration during 2020 and 2021.

Malmö, Sweden, August 2022
